

Secure, Connected, Intelligent Test Systems

Secure Your Test Environment. Turn Your Data Into Action.

CCI Test Partner securely connects and protects modern and legacy test systems. Integrated QualityLine analytics turns manufacturing data into insights that help improve quality and yield.

Secure Your Test Systems

Isolate test environments from network threats and enable secure connectivity.

Maintain Production

Support remote diagnostics and visibility across global manufacturing sites.

Protect Your Data

Back-up and securely deliver test data, even during network disruptions.

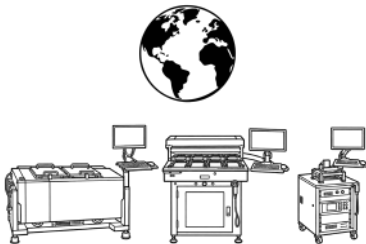

Turn Test Data into Action

Use QualityLine analytics to identify root causes, recommend corrective actions, and uncover potential failures earlier.

How It Works

Global Test Systems

Modern and legacy equipment

Secure remote access

Test limit & version control

Data collection & storage

Data protection & backup

QualityLine
Analytics

Root cause analysis

Corrective action
recommendations

Predictive insights

Factory-wide data correlation

Test + Production + Inspection + Repair + MES/ERP + Sensor Data

Included with New Circuit Check Test Systems

One year of secure analytics service, combining CCI Test Partner security and connectivity with QualityLine manufacturing analytics.

Effective with the integration. Included in the purchase price.

Built for an open test ecosystem.

Integrated QualityLine analytics, with compatibility for WATS, NI SystemLink, Keysight PathWave, and Microsoft PowerBI.
